

EMP Shield Military Testing & Certifications

**UL 1449 Compliant & ETL Listed
IP66 Water & Dust Rating**

MIL-STD-188-125-1 High Altitude
Electromagnetic Pulse.

MIL-STD-461G Electromagnetic
Interference.

MIL-STD-461-CS-115 Tests an
electrical systems ability to
withstand signals coupled onto the
test unit's associated cabling.

MIL-STD-461-CS116 Applies to 10
kHz to 100 MHz for all interconnecting
cables, including power cables, and
individual high side power leads.

MIL-STD-461 CS117 Ensures EMP
Shield's ability to withstand lightning
transients coupled onto the test unit's
associated cables and power leads.

MIL-STD-461-RS105 Transient
electromagnetic pulse of up to 50 kV/
m, double exponential wave with a rise
time in the nanosecond range.

MIL-STD-464C Electromagnetic
Environmental Effects Requirements
for Systems.

FOR HOMES OF ANY SIZE

**100% LIGHTNING
PROTECTION GUARANTEE**

**Listed by the Department
of Homeland Security in
their February 5th EMP
Resilience Report**

Whether you live in an RV,
camper, boat house, or a
mansion, EMP will protect
you from lightning, EMP's,
and all forms of power
surges.

**Custom Models Available
Starting At: \$349**

INDUSTRY LEADING WARRANTY

10 Year

\$50 Replacement

UNRIVALED PRODUCT CAPABILITIES

Scalable (AC / DC)

1v to 1000kV

AC & DC System Models

EMP Shield AC/DC models will protect your homes electrical system, all devices plugged in, generators, and solar systems.

3 Phase & RV

EMP Shield 3 Phase and Radio models will protect larger 3 phase electrical systems, large scale generators, and radio communication systems.
