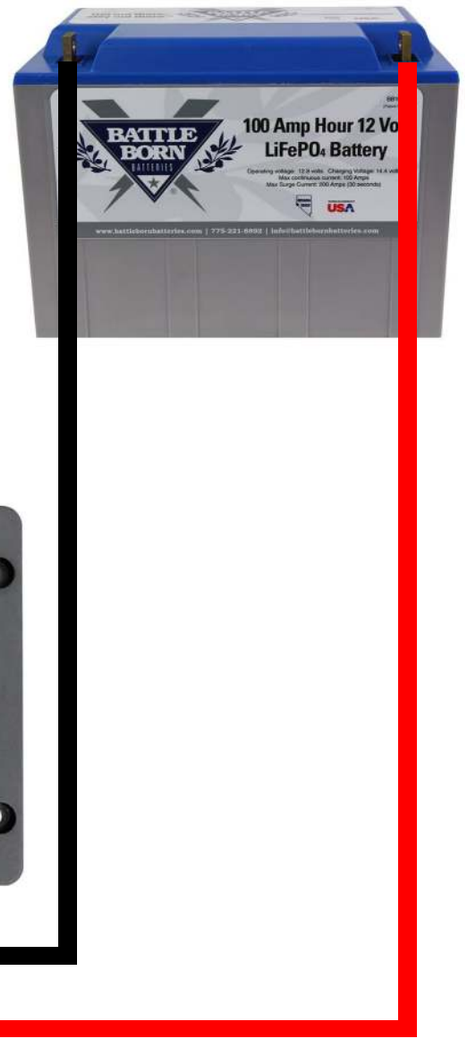
Single Solar System Installation



DC / Solar EMP Shield Wires

Red (Positive)	
Black (Negative)	
Green (Ground)	

Ground

EMP Shield Selection:

Always select your EMP Shield based on the maximum input voltage of the first device after the PV array. This device will most commonly be a charge controller for off grid systems or an inverter for grid tied systems.

For EMP Shield selection questions call: 620-412-9978
